i have my xm radio for 3 years.I beleve this apositive service because i am a truck driver and it involes safty issues because it gives us the traffic reports before we get to our destination and can plan altrnitiverts to avoid traffic congestion to get the loads to the customer on time because with regular radio yo might be out of range of he radio station also it mean that i dont have to search for a radio station every 50 or 60 miles or so so in the intrest of safty and other issues
